Full-Stack Developer

Currently co-developing two commercial products at an Oslo-based startup. Production experience spanning e-commerce platforms, real-time AI integrations, and multi-entity business systems.

Experience

Full-stack Developer

02.2026 – Present

Innoscribe | Oslo

- Built a complete multi-storefront e-commerce platform from scratch, including customer-facing storefront and a unified management dashboard supporting multiple warehouses, order management, inventory tracking, logistics, shipping, returns, and statistics.
- Implemented role-based access control separating storefront and warehouse operations across multiple business entities.
- Integrated Stripe payment processing and email services into the platform.
- Implemented caching and rate limiting for platform performance and API protection.
- Contributing to an AI-powered inbound phone assistant built with Node.js, PostgreSQL, ElevenLabs, and WebSockets, featuring a business-facing dashboard for configuration and call management, with integrations against Fiken, Tripletex, and Vipps.

Social Care Worker - Symra Bofellesskap | Oslo

06.2023 – Present

Personal Trainer - SATS Sandvika Panorama, Actic Furuset | Sandvika/Oslo

02.2020 – 05.2023

Education

Noroff | Backend-Development

08.2024 – 06.2026

Golden Egg Award 2026 - Best Student Work
